OMRON

Proximity Sensor Series

E2E NEXT / E2EW /E2ER / E2NC

Superior Proximity Solutions: Super Robust, Super Long distance detection, Short Body

IO-Link

Proximity sensors often break. Want to prevent broken sensors that would stop the manufacturing line?

Super Long *1

Collisions avoided by increasing clearances

Long-distance model > P4

*1. Based on OMRON investigation in October 2025. *2. Compared to our previous model based on in-house verification tests.

Fully armored with a full metal body

Full metal model > P6

Super robust *2

Short bodies seamlessly integrated into existing equipment

Super long distance detection with short bodies

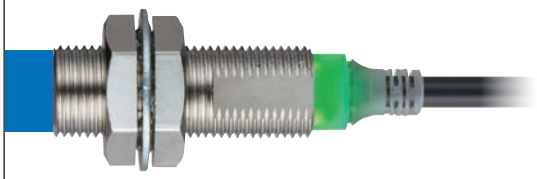
E2E NEXT Series

Previous model

Sensing distance 3 mm 0.12”

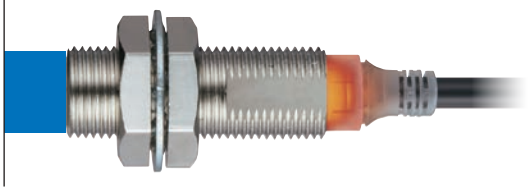
E2E NEXT triple distance model

Sensing distance **7 mm** 0.28”



E2E NEXT quadruple distance model

Sensing distance **9 mm** 0.35”

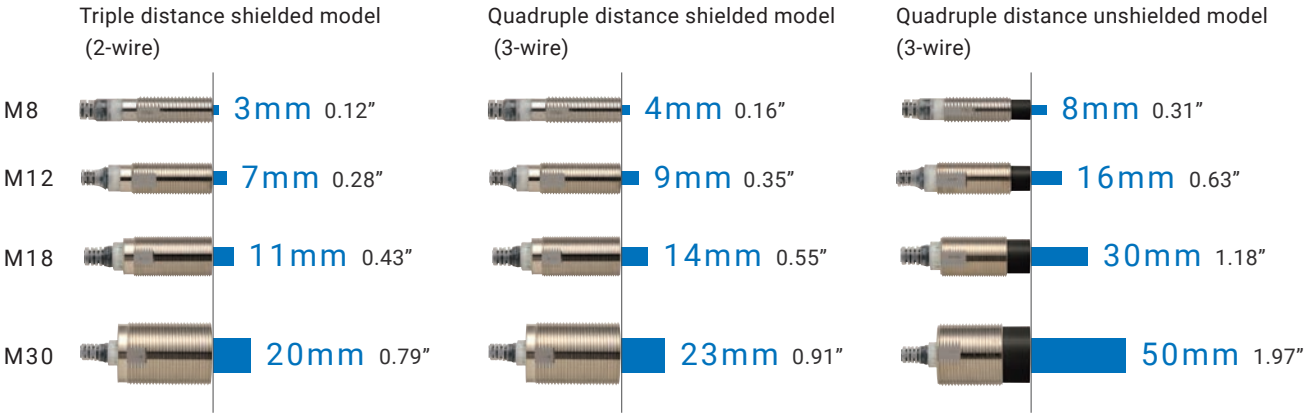


World’s longest among 2-wire models *1

3-wire, quadruple distance

Super long distance detection with short bodies, available in 2-wire and 3-wire models

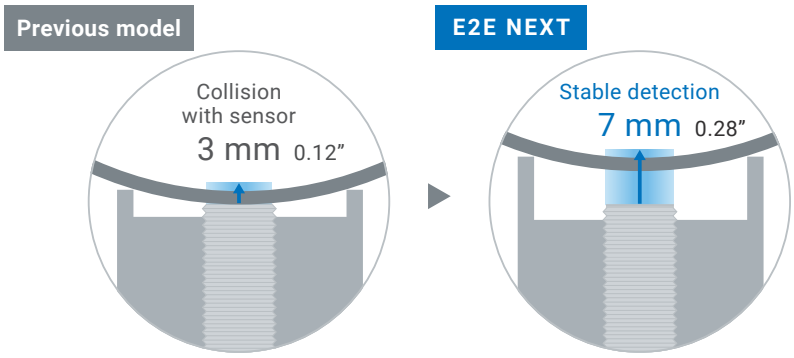
Sensing distances

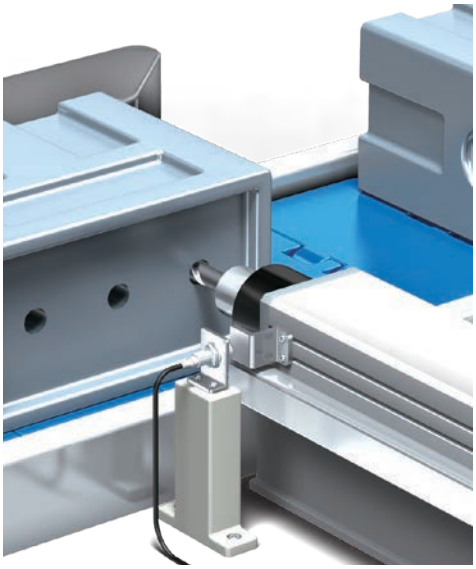


*1. Based on OMRON investigation in October 2025.

No collisions

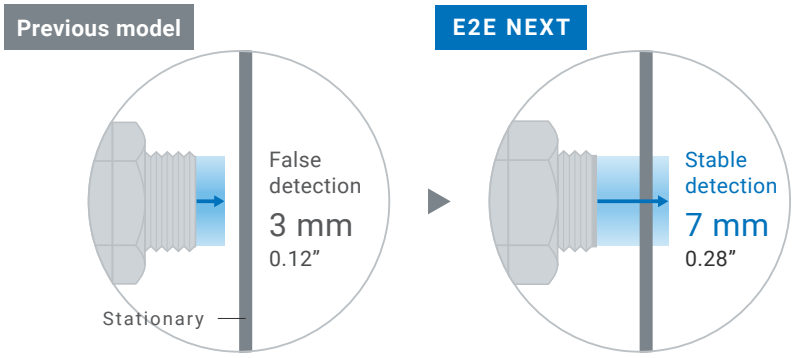
When the detection of automotive parts, proximity sensors often collide with workpieces. This leads to sensor breakage and causes equipment downtime. E2E NEXT long distance models can reduce such collisions and improve the equipment uptime.





No malfunctions

Highly vibrating equipment or heavy-load pallets may cause the stationary to be displaced from a proximity sensor, resulting in sensor malfunctions and stoppages. E2E NEXT long distance models can reduce such malfunctions and improve the equipment uptime.



“Thermal Distance Control”, the technology for stable long distance detection, combined with IoT

By combining the Thermal Distance Control technology for stable long distance detection with the analog-digital hybrid IC, the E2E NEXT Series eliminates the influence of temperature changes and individual sensor variations, which were hindering the increase of the sensing distance.

DC 2-wire, triple distance model (Thermal Distance Control)

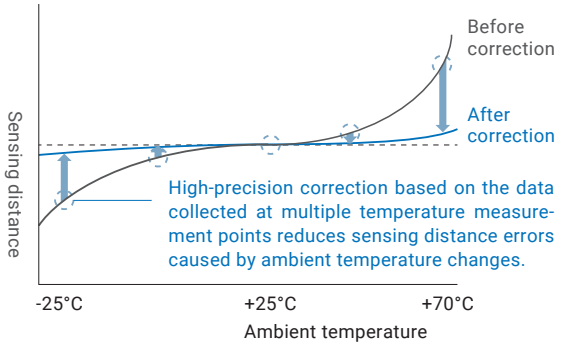
Temperature correction values are written into “PROX2”, the analog-digital hybrid IC, as the factory setting, which was not possible with previous analog ICs, to minimize the influence of temperature changes on the sensing distance.

DC 3-wire, quadruple distance model (Thermal Distance Control combined with IoT)

Patented *2

Temperature characteristics of each sensor are measured inline during the IoT-enabled production process, and then optimal correction values are calculated based on the unique algorithm and written into “PROX3”, the analog-digital hybrid IC. Thus the influence of temperature changes on the sensing distance and individual sensor variations can be minimized.

Sensing distance variation due to ambient temperature



*2. “Patent Pending” means that we applied for a patent in Japan, and “Patented” means that we obtained a patent in Japan. (As of October 2025)

Super robust full-metal body in a short-body form.

E2EW Series

The resin detection surface can be easily damaged by impact or wear.

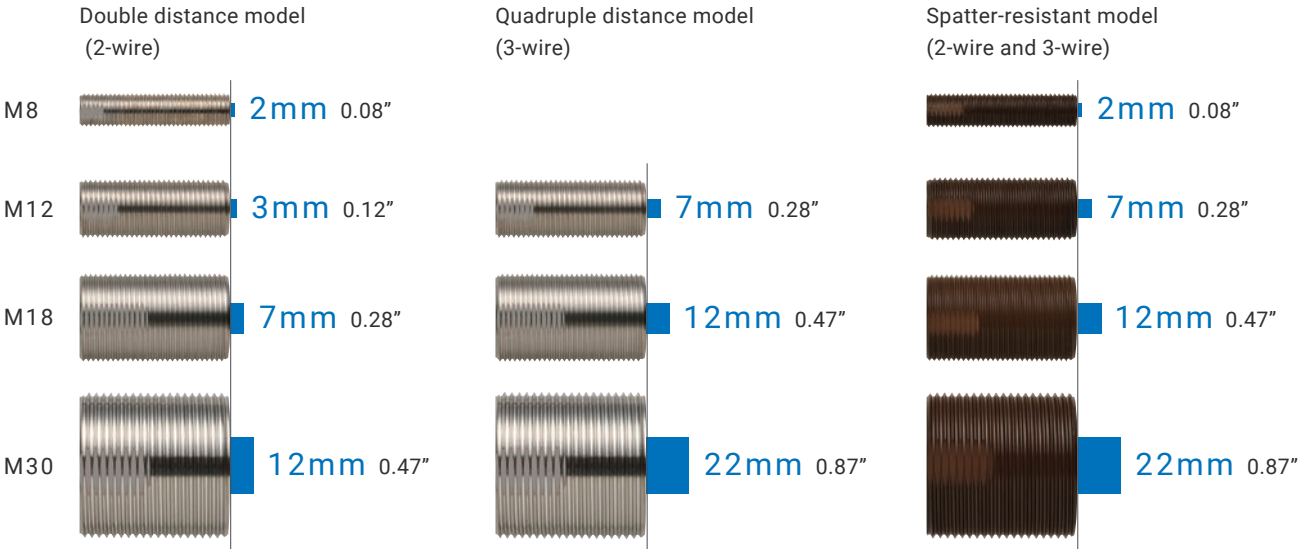
Previous model

The metal detection surface prevents damage from external forces.

E2EW Series full metal model

Full metal body highly resistant to impact and wear, available in 2-wire and 3-wire models

Metal model's sensing distances



Super robust full-metal body contributes to stable equipment operation

The metal head is highly resistant to friction and collision with workpieces and metal cleaning brushes, reducing unexpected downtime and replacement frequency due to failure caused by wear or collision compared to previous resin heads.

Spatter-resistant model E2EW-Q

Specialized models tailored to specific environmental needs also available

In addition to the standard models, the lineup includes compact models and spatter-resistant models coated with fluororesin that resists spatter adhesion. They can be safely used even in special environments.

Thick metal head structure

Resistant to friction with workpieces and metal cleaning brushes

In wear resistance tests using stainless-steel brushes rotating at 130 rpm, insulation breakdown occurred in 50 minutes for resin heads, while no insulation breakdown occurred even after 400 minutes for metal heads.

Note: Tests performed on an M18 quadruple distance model (with 0.4 mm (0.016") sensing surface thickness).

Brush test

Resin head

E2E-X7D1

Initial state

After 50 minutes

Insulation breakdown in 50 minutes

Metal head

E2EW-X12□18

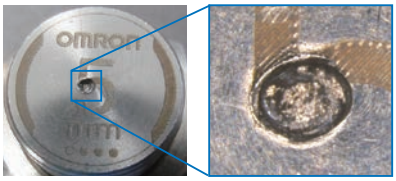
Initial state

After 50 minutes

After 400 minutes

No insulation breakdown after 400 minutes

Resistant to collision with workpieces



Continuous impact test

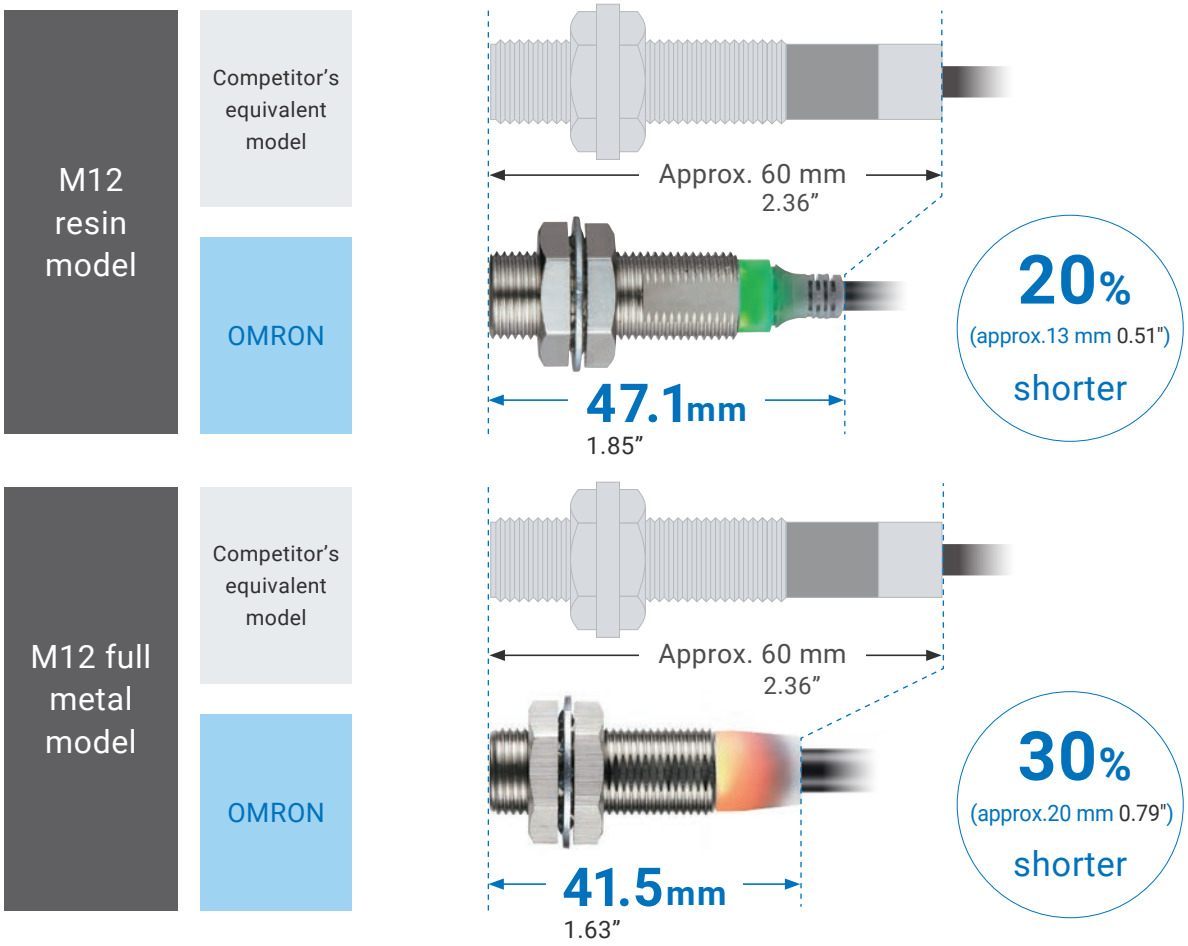
Continuous impact test results showed that the sensing surface was not penetrated even after impact was repeated 200,000 times. No insulation breakdown occurred.

Note: Sensing surface thickness varies for different models. Refer to the datasheet for details.

*1. This value assumes that the sensor operates 10 hours a day in an arc welding environment and is cleaned once a month (12 times a year). If our previous model (E2EF-Q) needs to be replaced once every 3 times it is cleaned, the E2EW-Q Proximity Sensor needs to be replaced once every 180 times it is cleaned. This means that there is no need to replace the E2EW-Q Proximity Sensor for 10 or more years.

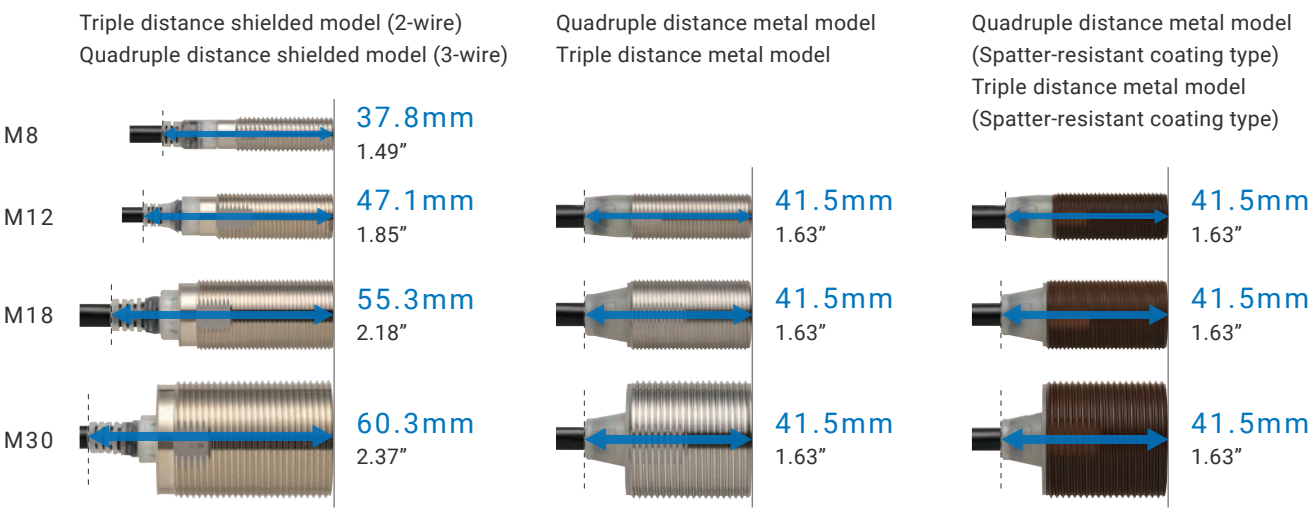
Short body to fit in narrow spaces

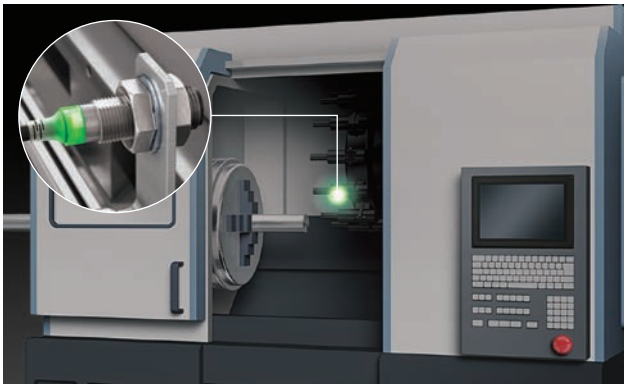
E2E NEXT Series E2EW Series



Short body, easy to install during setup and maintenance

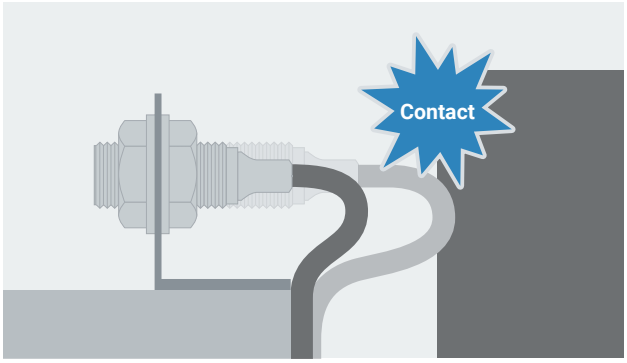
Body sizes





Seamless integration into existing environment

The long-distance or metal models can fit into even a limited installation space.



No large clearance required behind a sensor

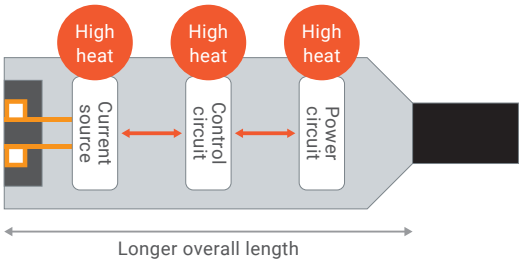
The short body with minimal protrusion at the back enables compact cable routing. This reduces the risk of cables trapping or coming into contact with objects.

Super long distance detection with short bodies

The pulse response method, which is well-suited for long distance detection, requires a large current that passes through the detection coil during detection, causing high power consumption and large heat generation. Excessive thermal stress from large heat generation will lower the reliability of electronic components, so they need a large clearance for heat dissipation between each other, leading to a longer overall sensor body.
The E2EW quadruple/triple distance models adopt an algorithm that simultaneously enhances detection performance and reduces power consumption, thereby minimizing heat generation in electronic components. This allows electronic components to be positioned near each other, shortening an overall sensor body.

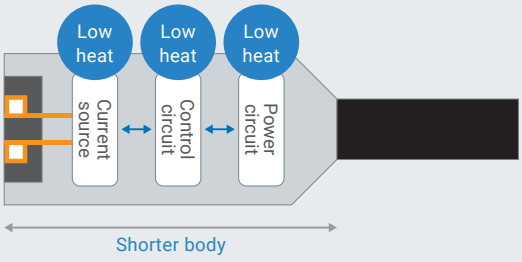
Common proximity sensor

With large heat generation in electronic components, they need a large clearance between each other, leading to a longer overall sensor body.



E2EW

An algorithm is adopted that simultaneously enhances detection performance and reduces power consumption. No large clearance for heat dissipation is necessary between electronic components, enabling high-density circuit layout and a shorter body.



Lineup to meet various application needs

General-purpose metal model

For a wide range of applications

E2EW Series

Stable long distance detection with full metal body

The sensing distance with a high margin is secured to reduce detection errors, minimizing unexpected stoppages.

Detection Distance markings to prevent errors

In addition to a wide lineup of various sensing distance models, the sensor distance is laser-printed*1 on the sensor head’s sensing surface, reducing mistakes during sensor installation and replacement.

Amplifier-integrated, small-diameter model

E2E, small diameter

Extensive lineup of compact models

The lineup includes a wide range of diameters—ø3, ø4, ø5.4, ø6.5, M4, M5, and more—for installation in confined spaces. Unshielded long-distance models are also available.

Amplifier-relayed, small-diameter model

E2EC-M/-Q

Compact, robust full metal models

For applications requiring compactness and durability, amplifier-relayed, compact metal models with short head body are provided. Models with fluororesin-coated head and featuring fluororesin cable are also available for welding processes.

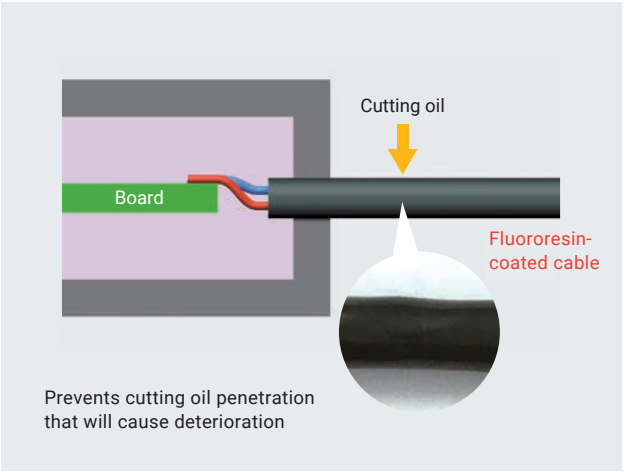
*1. Only for M12/M18/M30 sizes of E2EW full metal models

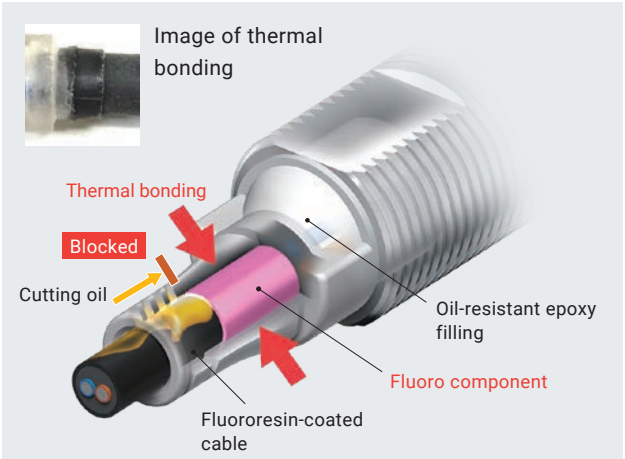
Oil-resistant model

For environments exposed to oil

Oil resistance 4 years

E2ER Series





Blocking oil entry through cables

Using fluororesin, a highly corrosion-resistant material, for the cable sheath suppresses swelling and deterioration of cables, preventing cutting oil from entering and reaching the board inside the sensor.

Blocking oil entry at cable joints with the advanced sealing technology

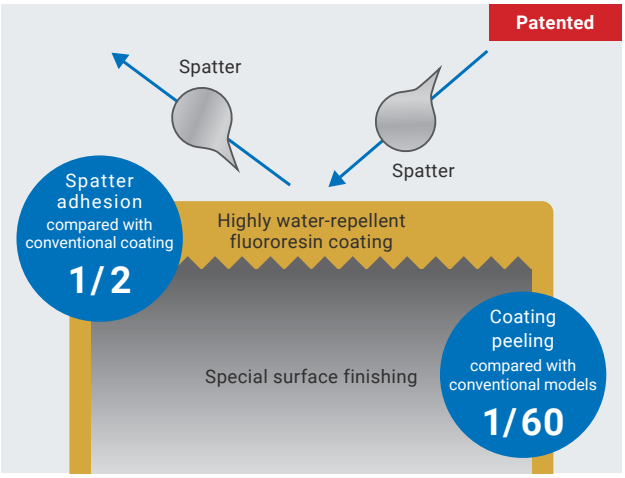
A fluororesin cable is heat-welded with a fluoro component which has a high bondability and a melting point close to that of the cable. This blocks the ingress of cutting oil from the joined surfaces.

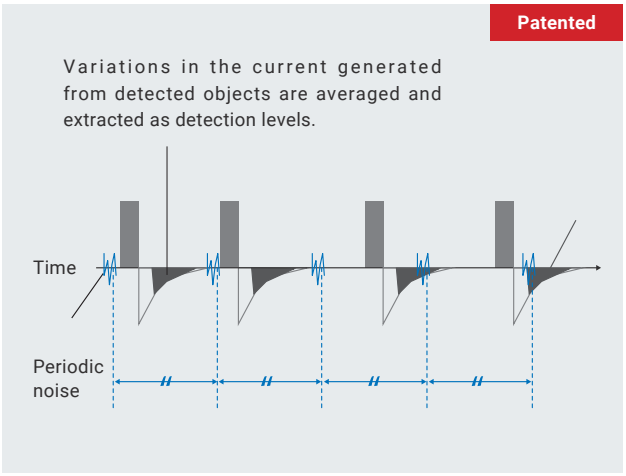
Spatter-resistant model

For welding applications

No need to replace for 10 years

E2EW-Q Series





Durable fluororesin coating that enhances resistance to spatter

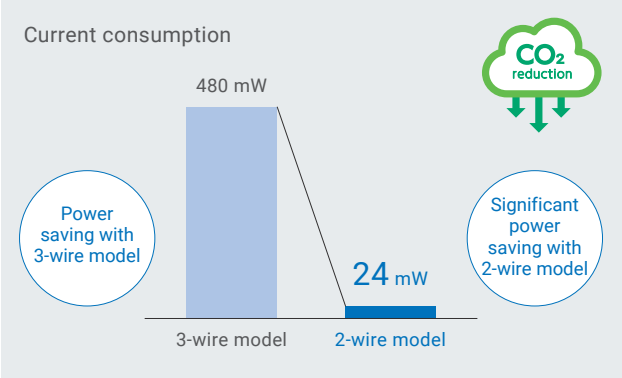
OMRON has combined the coating film technology that creates a highly water-repellent surface with the special processing of a substrate surface to achieve spatter resistance that eliminates the need for replacement for 10 years.*3

Noise suppression technology providing resistance to welding noise

The technology randomizes the timing of pulsed current to reduce the impact of periodic noise on the detection signals. By combining a delay timer, it cancels the magnetic field noise generated during welding, preventing malfunctions.

*2. "Patent Pending" means that we applied for a patent in Japan, and "Patented" means that we obtained a patent in Japan. (As of October 2025)
*3. This value assumes that the sensor operates 10 hours a day in an arc welding environment and is cleaned once a month (12 times a year). If our previous model (E2EF-Q) needs to be replaced once every 3 times it is cleaned, the E2EW-Q Proximity Sensor needs to be replaced once every 180 times it is cleaned. This means that there is no need to replace the E2EW-Q Proximity Sensor for 10 or more years.

Proximity sensors designed for ease of use



Environmentally friendly, low power consumption design

OMRON's proprietary noise suppression technology has achieved extended sensing distances with low power consumption. With 2-wire models that can reduce power consumption to 1/20, you can design more environmentally friendly equipment.

Protecting joints to prevent cable breakage

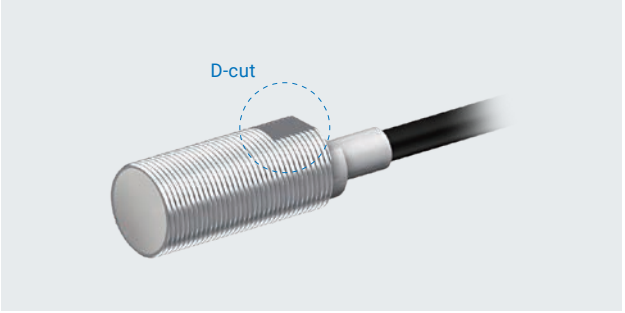
The most common point of cable breakage in proximity sensors is the joint between the sensor and the cable. OMRON prevents easy breakage by adopting a cable protector structure that flexes with the cable and by chamfering to prevent excessive bending.

Reducing impact of chips and spatter

E2EW (with the same resistance to chips and spatter as short-distance models) enables workpiece detection while reducing the impact of chips and spatter. It is also spatter-resistant coated to suppress spatter adhesion to the sensing surface.

Detecting iron and aluminum at the same long distance

OMRON's unique technology enables the detection of both iron and aluminum at the same long sensing distance. E2EW with the same sensing distance for both iron and aluminum eliminates the need to change the sensor size according to the workpiece. This enables the use of common production equipment and mechanical drawings.

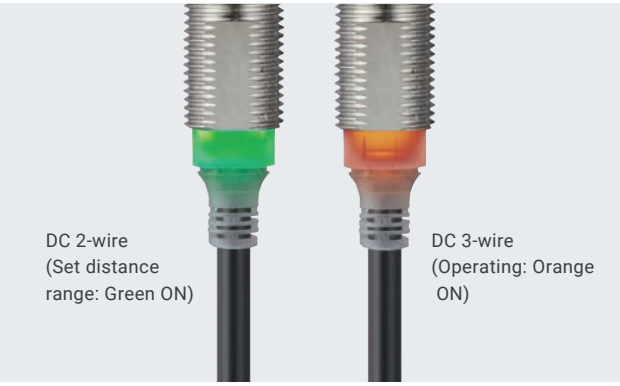


D-cut for easy installation

The cylindrical (screw-type) models feature a D-cut for secure grip with a wrench during installation, preventing sensor rotation and enabling smooth installation.

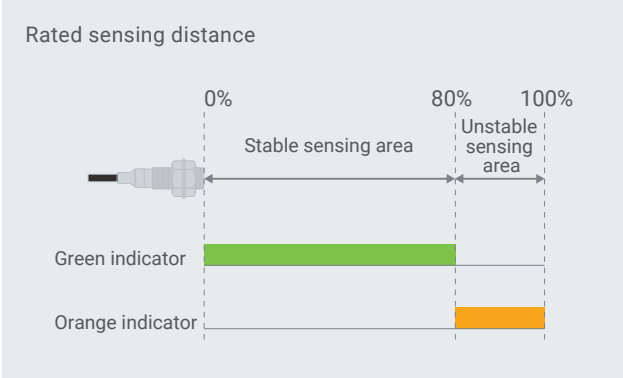
Flush mounting without changing the sensing distance

E2EW triple distance models (sensing distance: 6 mm (0.24")) can be embedded into an iron component and flush-mounted without changing the sensing distance.



360° visible indicator

The highly visible indicator light can be seen from any direction. This eliminates the need for troublesome sensor orientation adjustments and simplifies installation during startup and maintenance.

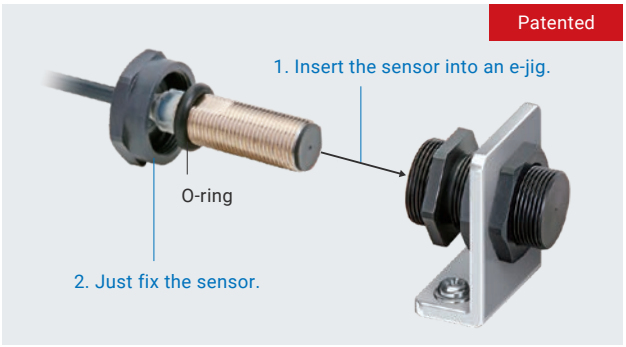


Color-coded stable sensing with 2-wire models

The 2-wire models feature a bi-color (green and orange) operation/setting indicator. The indicator lights green in the stable sensing area and orange in the unstable sensing area, allowing you to check stable detection at a glance.

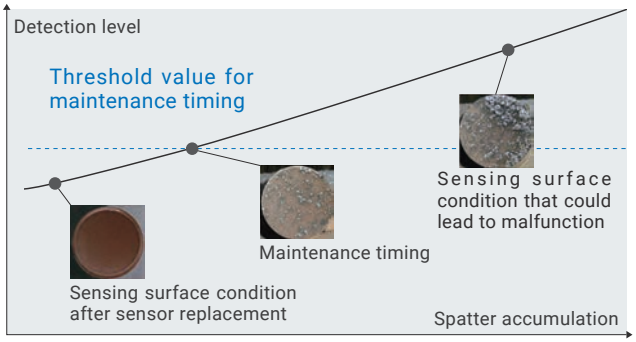
Models with bend-resistant cable available in the lineup

Highly flexible cables with excellent resistance to repeated bending are also available. They can reduce the risk of equipment downtime due to cable breakage even when used in moving parts.



Simple 10-second*2 replacement using e-jig

Combining a long-distance model with an e-jig allows anyone to easily fix a proximity sensor in place, greatly reducing replacement time. You can easily upgrade existing equipment to the one that enables sensor replacement within 10 seconds only.



Detection level and temperature visualization with IO-Link

Various data such as control signals and numerical values can be acquired via IO-Link communication. In addition, excessive proximity and unstable sensing alarms can be output or internal temperatures can be acquired via IO-Link, enabling predictive monitoring of equipment.

Suitable for rechargeable battery manufacturing lines

The lineup includes zinc- and copper-free models for rechargeable battery manufacturing lines. All nuts and washers are made of SUS303/304 stainless steel, ensuring reliable use.

*1. "Patent Pending" means that we applied for a patent in Japan, and "Patented" means that we obtained a patent in Japan. (As of October 2025)
*2. Time required to adjust the distance during sensor installation. Based on OMRON investigation.

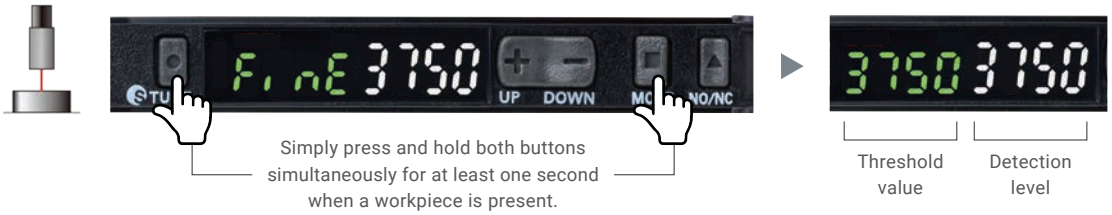
Amplifier-separated, multifunctional digital model

Smart proximity sensor that quantifies the detection status for easy high-precision sensitivity setting

E2NC Series

Fine Positioning (FP) function that maximizes variations, for high-precision positioning and screening

The E2NC's Fine Positioning function adjusts sensitivity to the detection level of 3750, where the variation is maximized when a workpiece is present. Not only does this enable precise ON/OFF detection, but by intentionally not setting it to 9999, it allows detection of excessive proximity conditions, reducing the risk of contact.

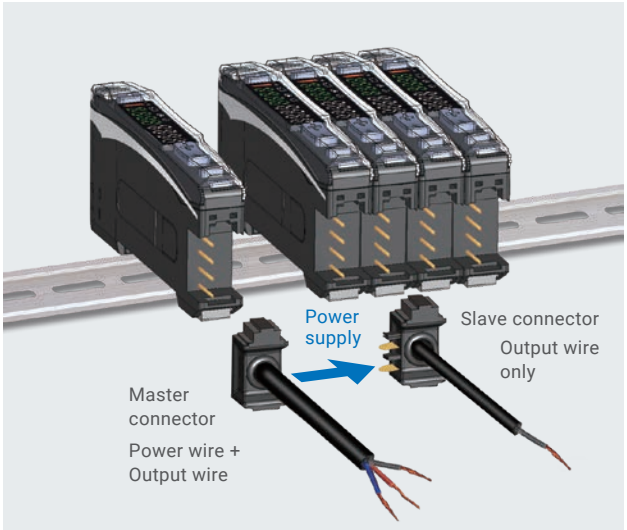


Wide variety of sensor heads to match your application

The lineup features seven head types, including compact heads with a minimum diameter of ø3 and heat-resistant heads. The preamplifier-to-amplifier connection uses a flexible cable, ensuring reliable performance even in moving parts.

High resistance to changes in ambient temperature with temperature characteristics of 0.08%/°C

High precision in detection requires accurate temperature characteristics. The E2NC head incorporates a preamplifier, making it less susceptible to ambient temperature changes and limiting distance variation to 0.08%/°C.



Reduced wiring x Mutual interference prevention

This wire-saving connector allows the expansion of up to 30 units and reduces wiring efforts. It also features mutual interference prevention capability for up to five units, which enables detection with sensor heads placed adjacent to each other.

High-speed 150 µs response

Stable detection is possible even for fast-moving small objects and rotating objects.

MEMO

E2E NEXT Series

DC 2-wire (Triple distance model)

Long-distance Detection Prevents Unexpected Facility Stoppages

- The world's longest sensing distance *1
  Nearly double the sensing distance of previous
- With high-brightness LED, the indicator is visible anywhere from 360°.
- Only 10 Seconds *2 to Replace a Proximity Sensor with the "e-jig" (Mounting Sleeve).
- Cables with enhanced oil resistance enabled 2-year oil resistance *3.
- IP69K compliant for water resistance and wash resistance.
- UL certification (UL60947-5-2) and CSA certification (CSA C22.2 UL60947-5-2-14)

*1. Based on October 2025 OMRON investigation.
*2. Time required to adjust the distance when installing a Sensor. Based on OMRON investigation.
*3. Refer to page 24 for details.

For the most recent information on models that have been certified for safety standards, refer to your OMRON website.

Refer to the *E2E NEXT Series* (Cat.No.D121) for *Safety Precautions*.

	Sensing surface	Polybutylene terephthalate (PBT)							
	Clamping nuts	Nickel-plated brass							
	Toothed washer	Zinc-plated iron							
	Cable	Vinyl chloride (PVC)							
Accessories		Instruction manual, Clamping nuts, Toothed washer							

✻1. Use the Sensor within the range in which the setting indicator (green LED) is ON.
✻2. The response frequency is an average value. Measurement conditions are as follows: standard sensing object, a distance of twice the standard sensing object, and a set distance of half the sensing distance.
✻3. The IP67G is the degree of protection which is defined according to the JIS (Japanese Industrial Standards).
The IP67 indicates the same level of protection as defined by the IEC, and the G indicates that a device has resistance to oil.
✻4. The Oil-resistant Component Evaluation Standards are OMRON's own durability evaluation standards.
2-year oil resistance indicates the median value of the product design and the oil-resistance performance criterion result (=Typical value).
The Pre-wired Connector Model verifies 2 years of oil resistance when mating with Round Oil-resistant Connectors XS5 NEXT series correctly.
The degree of protection is not satisfied with the part where cable wires are uncovered for the Pre-wired Models.

Note: 1. For details such as *Engineering Data*, *I/O Circuit Diagrams* and *Dimensions* refer to the *E2E NEXT Series* (Cat.No.D121).

E2E NEXT Series

DC 3-wire

Enables easier and standardized designs previously not possible

- Nearly double the sensing distance of previous
- With high-brightness LED, the indicator is visible anywhere from 360°.
- Only 10 Seconds *1 to Replace a Proximity Sensor with the "e-jig" (Mounting Sleeve).
- Cables with enhanced oil resistance enabled 2-year oil resistance *2.
- IP69K compliant for water resistance and wash resistance
- Comes in a wide variation to make sensor selection easy
- UL certification (UL60947-5-2) and CSA certification (CSA C22.2 UL60947-5-2-14)

For the most recent information on models that have been certified for safety standards, refer to your OMRON website.

***1.** Time required to adjust the distance when installing a Sensor. Based on OMRON investigation.
***2.** Refer to *Ratings and Specifications* for details. However, E2E Connector Models is excluded.

Refer to the *E2E NEXT Series* (Cat.No.D121) for *Safety Precautions*.

Model Number Legend

E2E - X (1) (2) (3) (4) (5) (6) (7) (8) - (9) - (10) (11)

No.	Type	Code	Meaning
(1)	Sensing distance	Number	Sensing distance (Unit: mm) (R: Indication of decimal point)
(2)	Shielding	Blank	Shielded
		M	Unshielded
(3)	Output configuration	B	PNP open collector
		C	NPN open collector
(4)	Operation mode	1	Normally open (NO)
		2	Normally closed (NC)
		3	Normally open, Normally closed (NO+NC)
(5)	Oscillation frequency type	Blank	Standard frequency

✻1. Models with 5-m cable length are also available with "5M" suffix. (Example: E2E-X9B1D12 5M)
✻2. Models with 2-m and 5-m robot (bending-resistant) cables are also available with "-R" in the model number. (Example: E2E-X9B1D12-R 2M/ E2E-X9B1D12-R 5M)
✻3. Models with M12 Smartclick connector model robot (bending-resistant) cables are also available with "R" in the model number. (Example: E2E-X9B1D12-M1TJR 0.3M)

Note: 1. Models in ☐ are equipped with IO-Link (COM2). For IO-Link (COM3), select a model number with the format of "E2E-X□□□T□" (Example: E2E-X9B1T12 2M).
Operation mode NO can be changed to NC via IO-Link communications.
Note: 2. IO-Link is not supported for NPN outputs.

Accessories (Sold Separately)

e-jig (Mounting Sleeves)

A Mounting Bracket is not provided with the Sensor. It must be ordered separately as required.

Appearance	Model	Applicable Sensor size	Applicable Sensor type
	**Y92E-J8S12**	M8	Quadruple distance Shielded Pre-wired models Standard body-sized
	Y92E-J12S18	M12	
	Y92E-J18S30	M18	

Nut Sets

A Nut Set is included with the Sensor. Order a Nut Set when required, e.g., if you lose the nuts.

Model	Applicable Sensors	Applicable Sensor diameter	Set contents
Y92E-NWM08-E2EN	Quadruple distance Shielded models	M8	Clamping nuts (bronze with nickel plating): 2 Toothed washer (iron with zinc plating): 2
Y92E-NWM12-E2EN		M12	
Y92E-NWM18-E2EN		M18	Clamping nuts (bronze with nickel plating): 2 Toothed washer (iron with zinc plating): 1
Y92E-NWM30-E2EN		M30	
Y92E-NWM08-E2E	Quadruple distance Unshielded models	M8	
Y92E-NWM12-E2E		M12	
Y92E-NWM18-E2E		M18	
Y92E-NWM30-E2E		M30	

Sensor I/O Connectors (Sold Separately) (Models for Pre-wired Connectors)

A Sensor I/O Connector is not provided with the Sensor. It must be ordered separately as required.

Connection method		Pre-wired Models (Standard cable length: 2 m) and Connector Models (M12 Connector, M8 (4-pin) Connector and M8 (3-pin) Connector)			
Weight ※4 (packed state)	Pre-wired	Approx. 85 g	Approx. 95 g	Approx. 190 g	Approx. 310 g
	Connector	Approx. 40 g (M8/M12 Connector)	Approx. 55 g	Approx. 105 g	Approx. 230 g
Materials	Case	Stainless (SUS303)	Nickel-plated brass		
	Sensing surface	Polybutylene terephthalat (PBT)			
	Clamping nuts	Nickel-plated brass			
	Toothed washers	Zinc-plated iron			
	Cable	Vinyl chloride (PVC) Note: Material of Pre-wired Models.			
Main IO-Link functions ※2		Operation mode switching between NO and NC, self diagnosis enabling, excessive proximity judgment distance selecting, timer function of the control output and timer time selecting, instability output (IO-Link mode) ON delay timer time selecting function, monitor output, operating hours read-out, readout of the sensor internal temperature, and initial reset			
IO-Link Communication specifications ※2	IO-Link specification	Ver1.1			
	Baud rate	COM2 (38.4 kbps), COM3 (230.4 kbps)			
	Data length	PD size: 2 bytes, OD size: 1 byte (M-sequence type: TYPE_2_2)			
	Minimum cycle time	COM2: 2.3 ms, COM3: 0.4 ms			
Accessories		Instruction manual, Clamping nuts, Toothed washer			

※1. The response frequency is an average value. Measurement conditions are as follows: standard sensing object, a distance of twice the standard sensing object, and a set distance of half the sensing distance.
※2. IO-Link is not supported for NC-type PNP outputs or all types of NPN outputs.
※3. The Oil-resistant Component Evaluation Standards are OMRON's own durability evaluation standards. 2-year oil resistance indicates the median value of the product design and the oil-resistance performance criterion result (=Typical value). Actual performance can be expected to decline after two years on average from shipment. The Pre-wired Connector Model verifies 2 years of oil resistance when mating with Round Oil-resistant Connectors XS5 NEXT series correctly. The degree of protection is not satisfied with the part where cable wires are uncovered for the Pre-wired Models.
※4. Weight of the standard body-sized model.

Note: 1. For details such as *Engineering Data*, *I/O Circuit Diagrams* and *Dimensions* refer to the *E2E NEXT Series* (Cat.No.D121).

MEMO

E2EW Series

DC 2-wire/DC 3-wire

Stable detection in lines containing both aluminum and iron

- Equivalent sensing distances for both iron and aluminum *1
- Enables common design for lines with both iron and aluminum *1
- The long distance sensing range, which means fewer false detections and thereby fewer unexpected stoppages.
- OMRON's unique fluororesin coating technologies enable long-lasting spatter resistance *3, eliminates the need to replace for 10 years *2.
- Durable full metal body to reduce unexpected stoppages
- 2-output (NO+NC) models and models with IO-Link *1 are also available.
- Laser printed information (sensing distance on the sensor head, model on the cable, and model on the metal part of the connector model) can be reducing errors during sensor replacement. *4
- Equipped with a function, which effectively cancels pulse noise of current magnetic field. *1
- UL certification (UL60947-5-2) and CSA certification (CSA C22.2 UL60947-5-2-14)

For the most recent information on models that have been certified for safety standards, refer to your OMRON website.

Refer to the *E2EW Series* (Cat.No.D122) for *Safety Precautions*.

***1.** PREMIUM Models only.
***2.** This value assumes that the sensor operates 10 hours a day in an arc welding environment and is cleaned once a month (12 times a year). If our previous model (E2EF-Q) needs to be replaced once every 3 times it is cleaned, the E2EW-Q Proximity Sensor needs to be replaced once every 180 times it is cleaned. This means that there is no need to replace the E2EW-Q Proximity Sensor for 10 or more years.
***3.** Models with spatter-resistant coating only.
***4.** Models without spatter-resistant coating only.

✻1. The response frequency is an average value. Factory setting: (timer function: ONOFF delay)
✻2. IO-Link is not supported for NPN outputs.
✻3. UL temperature rating is between 0°C to 60°C.
Note: 1. For details such as *Engineering Data*, *I/O Circuit Diagrams* and *Dimensions* refer to the *E2EW Series* (Cat.No.D122).

Proximity Sensors That Withstand Cutting Oil to Reduce Failures Caused by Ingress of Cutting Oil

- Fluororesin cable that withstands cutting oil.
- A sealing method that eliminates gaps at cable joints and the resin filling work together to block ingress of cutting oil.
- IP67G ✻ degree of protection (JIS C 0920 Annex 1).

For the most recent information on models that have been certified for safety standards, refer to your OMRON website.

Refer to the *Environment-resistant Series Oil-resistant Components* (Cat.No.Y215) for *Safety Precautions*.

✻ The IP67G is the degree of protection which is defined according to the JIS (Japanese Industrial Standards).
The IP67 indicates the same level of protection as defined by the IEC, and the G indicates that a device has resistance to oil.

Sensing distance		2 mm ±10%	3 mm ±10%	7 mm ±10%	10 mm ±10%
Set distance ✻1		0 to 1.6 mm	0 to 2.4 mm	0 to 5.6 mm	0 to 8 mm
Differential travel		15% max. of sensing distance	10% max. of sensing distance		
Detectable object		Ferrous metal (The sensing distance decreases with non-ferrous metal.)			
Standard sensing object		Iron, 8 × 8 × 1 mm	Iron, 12 × 12 × 1 mm	Iron, 18 × 18 × 1 mm	Iron, 30 × 30 × 1 mm
Response frequency ✻2		1.5 kHz	1 kHz	0.5 kHz	0.4 kHz
Power supply voltage		10 to 30 VDC, (including 10% ripple (p-p))			
Leakage current		0.8 mA max.			
Control output	Load current	3 to 100 mA			
	Residual voltage	3 V max. (Load current: 100 mA, Cable length: 2 m)			
Indicators		D1 Models: Operation indicator (red), Setting indicator (green) D2 Models: Operation indicator (red)			
Operation mode (with sensing object approaching)		D1 Models: NO D2 Models: NC			
Protection circuits		Surge suppressor, Load short-circuit protection			
Ambient temperature range		Operating: -25 to 70°C, Storage: -40 to 85°C (with no icing or condensation)			
Ambient humidity range		Operating and Storage: 35% to 95% (with no condensation)			
Temperature influence		±15% max. of sensing distance at 23°C in the temperature range of -25 to 70°C	±10% max. of sensing distance at 23°C in the temperature range of -25 to 70°C		
Voltage influence		±1% max. of sensing distance at rated voltage in the rated voltage ±15% range			
Insulation resistance		50 MΩ min. (at 500 VDC) between current-carrying parts and case			
Dielectric strength		1,000 VAC, 50/60 Hz for 1 minute between current-carrying parts and case			
Vibration resistance (destruction)		10 to 55 Hz, 1.5-mm double amplitude for 2 hours each in X, Y, and Z directions			
Shock resistance (destruction)		500 m/s^2 10 times each in X, Y, and Z directions	1,000 m/s^2 10 times each in X, Y, and Z directions		
Degree of protection		IP67 (IEC 60529) and IP67G ✻3 (JIS C 0920 Annex 1) Passed OMRON's Oil-resistant Component Evaluation Standards ✻4 (Cutting oil type: specified in JIS K 2241:2000, Temperature: 35 °C max.)			
Connection method		Pre-wired Models (Standard cable length: 2 m) and Pre-wired Connector Models (Standard cable length: 300 mm)			
Weight (packed state)	Pre-wired Models	Approx. 65 g	Approx. 75 g	Approx. 145 g	Approx. 215 g
	Pre-wired Connector Models	Approx. 30 g	Approx. 40 g	Approx. 90 g	Approx. 155 g
Materials	Case	Stainless steel (SUS303)	Nickel-plated brass		
	Sensing surface	Polybutylene terephthalate (PBT)			
	Clamping nuts	Nickel-plated brass			
	Toothed washer	Zinc-plated iron			
Accessories		Instruction manual			

✻1. Use the Sensor within the range in which the setting indicator (green LED) is ON (except D2 Models).
✻2. The response frequency is an average value.
Measurement conditions are as follows: standard sensing object, a distance of twice the standard sensing object, and a set distance of half the sensing distance.
✻3. The IP67G is the degree of protection which is defined according to the JIS (Japanese Industrial Standards).
The IP67 indicates the same level of protection as defined by the IEC, and the G indicates that a device has resistance to oil.
✻4. The Oil-resistant Component Evaluation Standards are OMRON's own durability evaluation standards.
The Pre-wired Connector Model meets the degree of protection when it is correctly connected with an XS5□R Oil-resistant Connector.
The degree of protection is not satisfied with the part where there is no XS5FR Oil-resistant Connector connected and cable wires are uncovered.
And as for the Pre-wired Models, the degree of protection is not satisfied with the part where cable wires are uncovered.

Note: 1. For details such as *Engineering Data*, *I/O Circuit Diagrams* and *Dimensions* refer to the *Environment-resistant Series Oil-resistant Components* (Cat.No.Y215).

E2EC-M/-Q

Improved Durability with Stainless Steel Sensing Head

Models with improved spatter resistance ideal for welding also available.

E2EC-M
E2EC-Q
Sensing Surface has 10 times the strength against wear, compared to previous models.

E2EC-M
E2EC-Q
Sensing head is 18 mm in length. Ideal for use embedded in devices.

E2EC-Q
Prevents adherence of weld spatter to the Sensing Head. (Improved spatter-resistant model)

E2EC-Q
Employs a fluoride cable (Improved spatter-resistant model)

For the most recent information on models that have been certified for safety standards, refer to your OMRON website.

For *Safety Precautions*, refer to the *E2EC-M/Q* on your website (www.fa.omron.co.jp/).

Ordering Information

Sensors

Appearance		Sensing distance	Output configuration	Model
				Operation mode: NO
Shielded When mounting to an iron surface	8 dia.	2 mm	DC 3-wire PNP	**E2EC-MC2B1 2M**
			DC 2-wire (polarity)	**E2EC-MC2D1 2M**
			DC 2-wire (no polarity) (3)-(4) pin arrangement	**E2EC-QC2D1-M1GJ-T 0.3M**

Accessories (Order Separately)

Sensor I/O Connector (M12, Sockets on One Cable End)

Models with Pre-wired Connectors: A Connector is not provided with the Sensor. Be sure to order a Connector separately.

Appearance	Cable length	Sensor I/O Connector model	Applicable Proximity Sensors
Straight 	2 m	**XS2F-D421-DD0**	E2EC-QC2D1-M1GJ-T
	5 m	**XS2F-D421-GD0**	
L-shape 	2 m	**XS2F-D422-DD0**	
	5 m	**XS2F-D422-GD0**	

Note: 1. The Sensor I/O Connector models in the previous table are for standard cables. Be sure to use a heat-resistant cable (XS2F-D42□-□80F) when using the Sensor in environments susceptible to spatter.
Note: 2. Refer to your OMRON website for details on the XS2.

	Cable Amplifier	Case	ABS resin		Stainless steel (SUS303)
		Cable	Polyvinyl chloride (PVC)		Fluorocarbon cable (flame-resistant)
Accessories			Amplifier Mounting Bracket, instruction manual		

Note: 1. Time is required for the sensing distance to stabilize after the power supply is turned ON. Confirm operation sufficiently in the actual operating environment and use the Sensor within the set distance to obtain a sufficient sensing distance.

Note: 2. For details such as *Engineering Data*, *I/O Circuit Diagrams* and *Dimensions* refer to the *E2EC-M/Q* on your website (www.fa.omron.co.jp/).

Ultra small size, but surprisingly easy installation!

- With the addition of M4, 5.4-dia., 6.5-dia. size, unshielded, pre-wired connector model, and connector model, a total of 108 model variations are available.
- High-speed response frequency stably detects moving objects: 5 kHz max.
- Four indicator lamps for easier indicator positioning.
- Special mounting brackets reduce time and efforts for installation.
- Protective Stainless-steel Spiral Tube against wire breakage is available (M4, M5 only).
- Models also available with standard cables that are 5 m long or with robot (bending-resistant) cables.

For the most recent information on models that have been certified for safety standards, refer to your OMRON website.

Refer to the *E2E Series* (Cat.No.D115) for *Safety Precautions*.

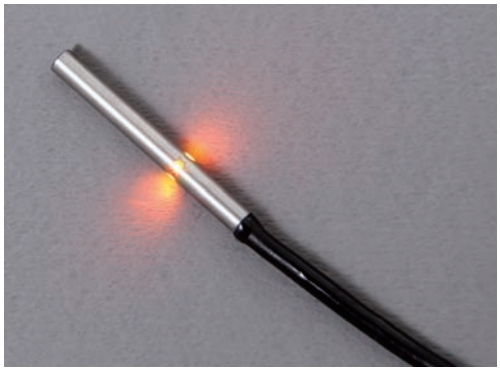
Features

Lineup of global small-diameter types (3 dia., 4 dia., 5.4 dia., 6.5 dia., M4, M5)

- A lineup of unshielded models for long distance sensing is also available. Stable long distance sensing performance enables worry-free use even when the work flow is unsteady.

Bright operation indicators make it easy to check operation status

- Four indicator lamps in a 360 degree layout can be easily seen.



High-speed response enables sharp detection timing

- 5 kHz response frequency max.

Protection circuits prevent failures due to wiring mistakes.

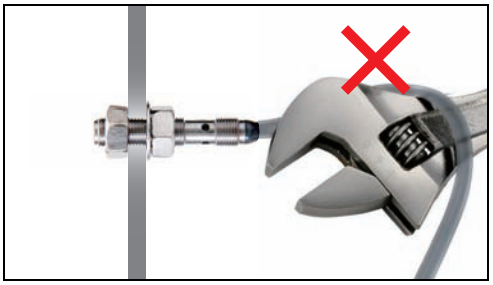
- Load short-circuit protection and output reverse polarity protection circuits are incorporated.

Environment friendly, low current consumption only 2/3 that of previous models

- All have a current consumption of 10 mA max.

Protective Stainless-steel Spiral Tube against wire breakage is available

- Lineup of protective tubes for M4 and M5 sizes. Reduces wire breakage due to catching and shock.



E2E (Small Diameter) Model Number Legend

E2E- (1) (2) (3) (4) - (5) - (6) (7) - (8) (9)

No.	Classification	Code	Meaning
(1)	Case material and shape	C	Cylindrical
		S	SUS, threaded
(2)	Size	03	Outer diameter 3 mm
		04	Outer diameter 4 mm
		05	Threaded: Outer diameter 5 mm, Cylindrical: Outer diameter 5.4 mm
		06	Outer diameter 6.5 mm
(3)	Shielding	S	Shielded Models
		N	Unshielded Models
(4)	Sensing distance	Number	R8: 0.8 mm, 01: 1 mm, 12: 1.2 mm, 02: 2 mm, 03: 3 mm, 04: 4 mm
(5)	Connecting method	WC	PVC Pre-wired Model
		MC	M8 Connector, 3-pin
		CJ	M8 Pre-wired Connector, 3-pin
(6)	Output specifications	B	DC 3-wire PNP open-collector output
		C	DC 3-wire NPN open-collector output
(7)	Operation mode	1	Normally open (NO)
		2	Normally closed (NC)
(8)	Cable specifications	Blank	Standard PVC cable
		R	Robot (bending-resistant) PVC cable
(9)	Cable length	Blank	Connector Models
		Number M	Cable length (Unit: m) (Applicable to Pre-wired Models 2M/5M and Pre-wired Connector Models 0.3M)

Note: The purpose of this model number legend is to provide understanding of the meaning of specifications from the model number. Models are not available for all combinations of code numbers.

(Example: E2E-C04S12-WC-C1-R 5M)

Accessories (Sold separately)

Sensor I/O Connector (Socket on One Cable End)

A Sensor I/O Connector is not provided with the Sensor. It must be ordered separately as required.

Size	Cable specifications	Number of cable wires (conductors)	Cable length L (m)	Straight	Right-angle
				Model	
M8	Standard cable	3	2	XS3F-M321-302-A	XS3F-M322-302-A
			5	XS3F-M321-305-A	XS3F-M322-305-A
	Robot (bendingresistant) cable		2	XS3F-M321-302-R	XS3F-M322-302-R
			5	XS3F-M321-305-R	XS3F-M322-305-R

Note: For details, refer to *XS3* on your OMRON website.

Mounting Brackets

A Mounting Bracket is not provided with the Sensor. It must be ordered separately as required.

Applicable Sensors	Appearance	Model	Quantity	Remarks
E2E-C03□		**Y92E-SC03**	1	Mounting block for 3 dia., M3-20 Hexagon socket head cap screws: 2pieces, M3 × P0.5 Hexagon nuts: 2pieces, Washers: 2pieces
E2E-C04□		**Y92E-SC04**	1	Mounting block for 4 dia., M3-20 Hexagon socket head cap screws: 2pieces, M3 × P0.5 Hexagon nuts: 2pieces, Washers: 2pieces
E2E-C05□		**Y92E-SC05**	1	Mounting block for 5.4 dia., M3-20 Hexagon socket head cap screws: 2 pieces, M3 × P0.5 Hexagon nuts: 2 pieces, Washers: 2 pieces
E2E-C06□		**Y92E-SC06**	1	Mounting block for 6.5 dia., M3-20 Hexagon socket head cap screws: 2pieces, M3 × P0.5 Hexagon nuts: 2pieces, Washers: 2pieces
E2E-S04□		**Y92E-SS04**	1	L-shaped Mounting Bracket for M4 screws
E2E-S05□		**Y92E-SS05**	1	L-shaped Mounting Bracket for M5 screws

Nut Set

A Nut Set is included with the Sensor. Order a Nut Set when required, e.g., if you lose the nuts.

Applicable Sensors	Model	Applicable sensor outer diameter	Set contents
E2E-S04□	**Y92E-NWS04**	M4	Clamping nuts: 2 pieces, toothed washer: 1 piece
E2E-S05□	**Y92E-NWS05**	M5	

Protective Stainless-steel Spiral Tube against Wire Breakage

A Spiral Tube is not provided with the Sensor. It must be ordered separately as required.

Applicable Sensors	Model	Applicable sensor outer diameter	Length
E2E-S04□	**Y92E-STS04-05**	M4	0.5 m
	Y92E-STS04-10		1 m
E2E-S05□	**Y92E-STS05-05**	M5	0.5 m
	Y92E-STS05-10		1 m

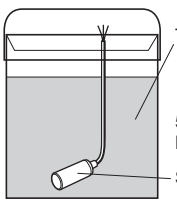
✻1. Using within the set distance enables high-speed responsiveness and a more stable repeat accuracy.
✻2. The response frequency is an average value.
✻3. When used at a power of 12 V, the Sensor is less susceptible to the effects of internal self heat generation and therefore a more stable repeat accuracy can be obtained.
✻4. When the control output is 20 mA or less, the Sensor is less susceptible to the effects of internal self heat generation and therefore a more stable repeat accuracy can be obtained.
✻5. 3 dia., M4: load current 50 mA, cable length 2 m
4 dia., 5.4 dia., M5: load current 100 mA, cable length 2 m
6.5 dia.: load current 200 mA, cord length 2 m
✻6. Oil resistance in-house standard:
Performance with respect to water insoluble oil.
(Test at right)
✻7. Material name in EN standards.
✻8. Clamping nuts: 2 pieces, toothed washer: 1 piece
Note: 1. For details such as *Engineering Data*, *I/O Circuit Diagrams* and *Dimensions* refer to the *E2E Datasheet* (Cat.No.D115).

Oil resistance test
After the test time elapses, the characteristics below are checked for problems.
(1) Visual appearance (no damage that affects product characteristics)
(2) Operation check (ON/OFF)
(3) Insulation resistance (50 MΩ min. at 500 VDC)
(4) Dielectric strength (500 VAC, 1 min.)
(5) Water resistance (IP67)



MEMO

Smart Proximity Sensor with Separate Amplifier Enables Easily Making Highprecision Sensitivity Settings.

For the most recent information on models that have been certified for safety standards, refer to your OMRON website.

- Wide variety of Sensor Heads to select according to the application. Flexible cables are used between Preamplifiers and Amplifier Units of the Sensor Heads.
- High resistance to changes in ambient temperature. Temperature characteristics of 0.08%/°C ✻
- Make simple and reliable detection settings with micronlevel precision using the teaching function.
- Check the sensing excess gain level on the digital display.
- Support for high-precision positioning and screening with fine positioning to maximize variations.
- The Model for Sensor Communications Units support an EtherCAT Sensor Communications Unit or CC-Link Sensor Communications Unit.

✻ Refer to the *Ratings and Specifications*.

⚠ Refer to the *E2NC Series* (Cat.No.E473) for *Safety Precautions*.

		Connector for Sensor Communications Unit Pre-wired (2 m)	1 output	**E2NC-EA10 2M**	**E2NC-EA40 2M**

✻A Sensor Communications Unit is required if you want to use the Amplifier Unit on a network.

Accessories (Sold Separately)

Wire-saving Connectors (Required for models for Wire-saving Connectors.)

Connectors are not provided with the Fiber Amplifier Unit and must be ordered separately. ✻Protective stickers are provided.

Type	Appearance	Cable length	No. of conductors	Model	Applicable Amplifier Units
Master Connector		2 m	4	**E3X-CN21**	**E2NC-EA7TW** **E2NC-EA9TW** **E2NC-EA7** **E2NC-EA9**
Slave Connector			2	**E3X-CN22**	

End Plate

Two End Plates (PFP-M) are provided with the Sensor Communications Unit.
End Plates (PFP-M and E39-EP1) are not provided with the Amplifier Unit. They must be ordered separately as required.

Input/ output	Output		2 outputs		1 output	1 output ✻2	2 outputs ✻3
	External inputs ✻4		1 input	---	1 input	---	---
Power supply voltage			10 to 30 VDC, including 10% ripple (p-p)			Refer to the communication unit specifications.	
Power consumption ✻5			At Power Supply Voltage of 24 VDC Normal mode: 1,080 mW max. (Current consumption at 45 mA max.), Eco function ON: 840 mW max. (Current consumption at 35 mA max.), Eco function LO: 960 mW max. (Current consumption at 40 mA max.)				
Control output			Load power supply voltage: 30 VDC max., open collector output Load current: Groups of 1 to 3 Amplifier Units: 100 mA max., Groups of 4 to 30 Amplifier Units: 20 mA max. Residual voltage: At load current of less than 10 mA: 1 V max. At load current of 10 to 100 mA: 2 V max. OFF current: 0.1 mA max.				Refer to the communication unit specifications.
Indicators			7-segment displays (Sub digital display: green, Main digital display: white) Display direction: Switchable between normal and reversed. OUT indicator (orange), NO/NC indicator (orange), ST indicator (blue) and OUT selection indicator (orange, only on models with 2 outputs)				
Protection circuits			Power supply reverse polarity protection, output short-circuit protection and output reverse polarity protection				Power supply reverse polarity protection, output short-circuit protection
Response time	Super-high-speed mode (SHS)		Operate or reset: 150 µs				
	High-speed mode (HS)		Operate or reset: 300 µs (default setting)				
	Standard mode (Stnd)		Operate or reset: 1 ms				
	GIGA power mode (GIGA)		Operate or reset: 4 ms				
Sensitivity adjustment			Smart Tuning (Fine Positioning, 2-point Tuning, Position Tuning, Percentage Tuning (-99% to 99%), Full Auto Tuning, or manual adjustment				
Maximum connectable Units			30 units			16 units	With E3NW-ECT: 30 units ✻6 With E3NW-CCL: 16 units
No. of Units for mutual interference prevention			Up to five units, intermittent oscillation method (response time = (No. of connected units + 1) x 15 ms) **Note:** The mutual interference prevention function is disabled if Super High Speed mode (SHS) is selected for detection function.				
Functions	Operation mode		NO (Normally Open)/NC (Normally closed)				
	Timer		Select from timer disabled, OFF-delay, ON-delay, one-shot, or ON-delay + OFF-delay timer: 1 to 9,999 ms				
	Differential detection		Single edge: Can be set to 250 µs, 500 µs, 1 ms, 10 ms, or 100 ms.				
	Zero reset		Provided Zero-reset is accompanied by a change of detection distance. After zero-reset, some threshold level may also cause a change of the indication by influence of other settings.				
	Resetting settings ✻7		Select from initial reset (factory defaults) or user reset (saved settings).				
	Eco mode		Select from OFF (digital display lit), Eco ON (digital display not lit), and Eco LO (digital display dimmed).				
	Bank switching		Select from banks 1 to 4.				
	Output 1		Select from normal detection mode, area detection mode or differential detection mode.				
	Output 2		Select from normal detection mode, alarm output mode, error output mode or disconnection detection output mode.		---	---	Select from normal detection mode, alarm output mode, error output mode or disconnection detection output mode.
	External input		Select from input OFF, 2-point Tuning, Percentage Tuning, Full Auto Tuning, Fine Positioning, zero reset, synchronization detection, or bank switching.	---	Select from input OFF, 2-point Tuning, Percentage Tuning, Full Auto Tuning, Fine Positioning, zero reset, synchronization detection, or bank switching.	---	---
	Hysteresis width		Select from standard setting or user setting. For a user setting, the hysteresis width can be set from 0 to 9,999.				
	Changing the displays		Threshold/ Detected intensity ratio, Peak receiving Detected amount/ Bottom Detected amount, Threshold bar display, Peak Detected amount/ Receiving Detected and CH number/ Detected amount			Threshold/ Detected intensity ratio, Peak receiving Detected amount/ Bottom Detected amount, Threshold bar display, Peak Detected amount/ Receiving Detected and CH number/ Detected amount

✻1. The communication unit is compatible with EtherCAT type E3NW-ECT and E3NW-CCL of CC-Link. This unit is not usable with E3NW-CRT.
✻2. Channel 1 of each amplifier unit is output as the output drawn by the cord.
✻3. Output signals from two sensors are assigned to the PLC via the network.
Various settings can be changed and detected values can be read by operating the PLC via the network.
✻4. The following details apply to the input.

	Contact input (relay or switch)	Non-contact input (transistor)	Input time ✻4-1
NPN output E2NC-EA21 E2NC-EA7	ON: Shorted to 0 V (Sourcing current: 1 mA max.). OFF: Open or shorted to Vcc.	ON: 1.5 V max. (Sourcing current: 1 mA max.) OFF: Vcc - 1.5 V to Vcc (Leakage current: 0.1 mA max.)	ON: 9 ms min. OFF: 20 ms min.
PNP output E2NC-EA51 E2NC-EA9	ON: Shorted to Vcc (Sinking current: 3 mA max.). OFF: Open or shorted to 0 V.	ON: Vcc - 1.5 V to Vcc (Sinking current: 3mA max.) OFF: 1.5 V max. (Leakage current: 0.1 mA max.)	

✻4-1. Input time is 25 ms (ON)/(OFF) only when (in tUnE) or (in PtUn) input is selected.

✻5. At Power supply voltage of 10 to 30 VDC
Normal mode: 1,110 mW max. (Current consumption: 37 mA max. at 30 VDC, 76 mA max. at 10 VDC)
Eco function ON: 900 mW max. (Current consumption: 30 mA max. at 30 VDC, 48 mA max. at 10 VDC)
Eco function LO: 1,020 mW max. (Current consumption: 34 mA max. at 30 VDC, 58 mA max. at 10 VDC)
✻6. When connected to an OMRON NJ-series Controller. For details, refer to the communication unit manual.
✻7. The bank is not reset by the user reset function or saved by the user save function.
Note: For details such as *Engineering Data*, *I/O Circuit Diagrams* and *Dimensions* refer to the *E2NC Datasheet* (Cat.No.E473).

Terms and Conditions Agreement

Read and understand this catalog.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

Warranties.

(a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.

(b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.

See http://www.omron.com/global/ or contact your Omron representative for published information.

Limitation on Liability; Etc.

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

Programmable Products.

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

Errors and Omissions.

Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.
